

WHAT IS CLAIMED IS

5

1. A telephone set identifying method for identifying a type of portable telephone set to which a data processing apparatus is coupled, comprising the steps of:

10 identifying the type of the portable telephone set based on a response with respect to an operation start signal which is output to a data interface part of the portable telephone set.

15

2. A telephone set identifying method for identifying a type of portable telephone set to which a data processing apparatus is coupled, comprising the steps of:

20 identifying the type of the portable telephone set based on a waveform of a signal output from a specific terminal of a data interface part of the portable telephone set.

30

3. A telephone set identifying method for identifying a type of portable telephone set to which a data processing apparatus is coupled, comprising the steps of:

35 identifying the type of the portable telephone set based on an allocation pattern of input and output terminals of a data interface part of the portable telephone set.

4. A telephone set type identifying apparatus for identifying a type of portable telephone set to which a data processing apparatus is coupled, comprising:

5 means for identifying the type of the portable telephone set based on a response with respect to an operation start signal which is output to a data interface part of the portable telephone set.

10

5. A telephone set type identifying apparatus for identifying a type of portable telephone set to which a data processing apparatus is coupled, comprising:

15 means for identifying the type of the portable telephone set based on a waveform of a signal output from a specific terminal of a data interface part of the portable telephone set.

25 6. A telephone set type identifying apparatus for identifying a type of portable telephone set to which a data processing apparatus is coupled, comprising:

30 means for identifying the type of the portable telephone set based on an allocation pattern of input and output terminals of a data interface part of the portable telephone set.

35

7. A PC card comprising:

said telephone set type identifying apparatus  
5 comprising:

10 set.

15

said telephone set type identifying apparatus  
20 comprising:

25

30           a telephone set type identifying apparatus  
identifying a type of portable telephone set to  
which a data processing apparatus is coupled,  
          said telephone set type identifying apparatus  
comprising:

35 means for identifying the type of the portable  
telephone set based on an allocation pattern of  
input and output terminals of a data interface part

5

10

15

20

25

30

35

a data interface part of the portable telephone set.

5

13. A processing apparatus operatively coupled between a communication equipment and an information processing apparatus, comprising:

an identifying part identifying a type of the communication equipment and outputting an identification signal; and

a switching part switching a communication protocol prestored for each type of the communication equipment, based on the identification signal.

20

14. The processing apparatus as claimed in claim 13, wherein the communication equipment is a mobile communication equipment.

25

15. The processing apparatus as claimed in claim 14, wherein the mobile communication is a mobile telephone set capable of making a communication while moving or a personal handy-phone system telephone set unsuited for making a communication while moving.
